ABSTRACT

This document summarizes materials on aquatic education used by state programs. Emphasis is on materials developed by, or adapted for use with, programs in various states and territories. The 234 entries are categorized as activity books, brochures, newsletters, posters, videos, and other materials. Major subjects include fishing, boating and other water sports, various freshwater and oceanic ecosystems, specific aquatic animal and plant species, water use and conservation, and reclamation of polluted areas. Some publications present career opportunities in the natural resources field. Each entry includes availability information; dimensions, color, format, or length; target audience; topics; and a brief description. (JAT)

SPORT FISH RESTORATION

Introduction

This document was originally designed to serve as a handbook for participants in the "Sharing Session" at the National Aquatic Education Conference in Omaha. Since that conference did not happen, and several people had already sent information, The Iowa Department of Natural Resources Aquatic Education Program allocated staff time to complete the summarization of materials used by state programs, with particular emphasis on those materials developed specifically by, or adapted for use with, a state program.

Materials are categorized as Activity Books, Brochures, Newsletters, Posters, Videos and "Other" materials. Basic information is included for each item along with a contact person for more information. Information was solicited from all state/territory-sponsored programs using AFTMA's address list.

Data entry and layout by Gloria Baker, Iowa Department of Natural Resources. Data solicitation by Barb Gigar, Iowa Department of Natural Resources. Editing by Gloria Baker and Barb Gigar.

THANKS!

Thank you to all Aquatic Education Coordinators who provided information about your materials. This information will be very useful as new coordinators enter the field and as programs expand and develop new materials.

Printing of this publication was provided by the Iowa Department of Natural Resources Aquatic Education Program which is funded, in part, with Sport Fish Restoration Funds.
